

## Maths

The key concepts that we concentrate on for Maths during Nursery are:

- Enjoy taking part in number rhymes
- Recite numbers past 5.
- Counting objects accurately up to 5, then 10 and know that the last number reached is the total.
- When counting, say one number for each item in order.
- Show finger numbers up to 5, then 10.
- Link numerals and amounts.
- Compare quantities and use mathematical language e.g. more than, fewer than, the same.
- Talk about and explore 2d shapes and use mathematical language to describe them.
- Understand and use positional language e.g. on top, under, behind, in front etc.
- Compare objects by size using mathematical language.
- Identify and create repeating patterns.
- Describe and sequence events using words such as first, next.
